

**EXHIBIT B**

**CONDITIONS OF APPROVAL FOR  
STENOVEC VESTING TENTATIVE PARCEL MAP SUB2014-00045 (CO13-0013)**

**Approved Project**

1. A Vesting Tentative Parcel Map (CO13-0013) to subdivide an existing 5.07 acre parcel into two parcels of 3.07 and 2.0 acres for the purpose of sale and/or development. The proposal also includes abandonment of a portion of Edgewood Drive and Los Aguas Lane rights-of-way shown on Tract 681.

**Access and Improvements**

2. Roads and/or streets to be constructed to the following standards, unless design adjustments are approved by the Public Works Department in accordance with Section 1.2 of the Public Improvement Standards:
  - a. The existing Tiburon Way improvements fronting the project site shall be reconstructed to repair deteriorated improvements and/or upgraded as required to conform to current Public Improvement Standards for an A-1 urban road and B-1 driveway.
3. The Applicant shall reserve the following private easements by certificate on the map or by separate document:
  - a. By separate document and prior to approval of the improvement plans, a minimum 20-foot offsite shared private access and utility easement in favor of Parcel 2 with additional width as necessary to include all elements of the future roadway prism, from the boundary of Parcel 2 back to the nearest publicly maintained road, Tiburon Way.
4. If a drainage basin is required, the drainage basin along with rights of ingress and egress shall be reserved as a drainage easement in favor of the owners and assigns of both parcels.

**Improvement Plans**

5. Improvement plans shall be prepared in accordance with County Public Improvement Standards by a Registered Civil Engineer and submitted to the Department of Public Works and the county Health Department for approval. The plan is to include, as applicable:
  - a. Street plan and profile.
  - b. Drainage ditches, culverts, and other structures (if drainage calculations require).
  - c. Water plan (County Health).
  - d. Public utility plan, showing all existing utilities and installation of all utilities to serve every lot.
6. All existing overhead electric power, telephone and cable television transmission and distribution lines fronting or contained within the project boundary shall be relocated underground [21.03.10(h)] and the poles removed.
7. All new electric power, telephone and cable television services shall be completed to each new parcel and ready for service. Applicant responsibilities for electric service and

distribution line extensions (facilities and equipment) are detailed in PG&E Electric Rule No. 15 and Rule No. 16, respectively.

8. **Prior to final map recordation**, electric, telephone, and cable television services shall be completed, and shall meet the utilities' installation requirements, unless (in-lieu) financial arrangements with the utility for the installation of these systems have been made.
9. New gas distribution mains shall be installed along the entire project frontage(s) and gas service laterals shall be stubbed to each new parcel unless otherwise directed by the gas purveyor.
10. All project related drainage shall be designed and constructed in accordance with the recommendations of the San Luis Creek Watershed Drainage Design Manual.
11. The applicant shall enter into an agreement and post a deposit with the County for the cost of checking the map, the improvement plans, if any, and the cost of inspection of any such improvements by the county or its designated representative. The applicant shall also provide the county with an Engineer of Work Agreement retaining a Registered Civil Engineer to furnish construction phase services, Record Drawings and to certify the final product to the Department of Public Works.
12. The Registered Civil Engineer, upon completion of the improvements, shall certify to the Department of Public Works that the improvements are made in accordance with all conditions of approval, including any related land use permit conditions and the approved improvement plans. All public improvements shall be completed prior to occupancy of any new structure.

#### **Stormwater Pollution Prevention**

13. **At the time of application for construction permits**, the applicant shall demonstrate whether the project (including both public and private improvements) is subject to the LUO Section for Stormwater Management by submitting a Stormwater Control Plan (SWCP) to show what is required to satisfy post construction requirements for stormwater treatment. It shall be prepared by an appropriately licensed professional to the County for review and approval. The SWCP shall incorporate appropriate BMPs, shall demonstrate compliance with Stormwater Quality Standards and shall include a preliminary drainage plan and preliminary erosion and sedimentation control plan. The applicant shall submit complete drainage calculations for review and approval.
14. If stormwater treatment facilities are to be construction with subsequent individual lot development, each lot will be required to perform its own stormwater treatment on site (and as if it were not a detached single family residence) regardless of its own impervious footprint. It will be required to tract its stormwater per the performance requirements determined by the total assumed impervious square footage of the tract.
15. Stormwater treatment facilities for public or common area improvements (including those for fronting and interior roadways) shall be constructed with those improvements.
16. An impervious area ceiling must be determined for each lot and noting that as a building restriction on an Additional Map Sheet is required.
17. **At the time of submittal of the improvement plans**, if necessary, the applicant shall submit a draft "Private Stormwater Conveyance Management and Maintenance System" exhibit for any proposed post construction structural treatment device for review and approval by the County.

18. **At the time of application for construction permits**, if necessary, the applicant shall submit a draft "Private Stormwater Conveyance Management and Maintenance System" exhibit for any proposed post construction structural treatment device for review and approval by the County.
19. **Prior to approval of improvement plans**, if necessary, the applicant shall record with the County Clerk the "Private Stormwater Conveyance Management and Maintenance System" to document on-going and permanent storm drainage control, management, treatment, disposal and reporting.
20. **Prior to approval of the construction permits**, if necessary, the applicant shall record with the County Clerk the "Private Stormwater Conveyance management and Maintenance System" to document on-going and permanent storm drainage control, management, treatment, disposal and reporting.

#### **Fire Protection**

21. The applicant shall obtain a fire safety clearance letter from CalFire establishing fire safety requirements prior to filing the final parcel or tract map.

#### **Parks and Recreation (Quimby) Fees**

22. Unless exempted by Chapter 21.09 of the county Real Property Division Ordinance or California Government Code section 66477, prior to filing of the final parcel or tract map, the applicant shall pay the in-lieu fee that will be used for community park and recreational purposes as required by Chapter 21.09. The fee shall be based on the total number of new parcels or remainder parcels shown on the map that do not already have legal residential units on them.

#### **Easements**

23. **Prior to recordation of the final parcel or tract map**, the property owner shall grant an avigation easement to the County of San Luis Obispo. The avigation easement document shall be prepared, reviewed and approved by County Counsel. Based on the encumbrances identified in the preliminary title report submitted to the County, additional documents, including, without limitation, a Consent of Lienholder or Consent of Lessee, may be required in connection with the avigation easement. The avigation easement document shall be reviewed and approved by County Counsel prior to filing of the final parcel or tract map.

#### **Additional Map Sheet**

24. The applicant shall prepare an additional map sheet to be approved by the county Department of Planning and Building and the Department of Public Works. The additional map sheet shall be recorded with the final parcel or tract map. The additional map sheet shall include the following:
  - a. If a fenced drainage basin is required, that the owner(s) of all lot(s) are responsible for on-going maintenance of drainage basin fencing, in perpetuity.
  - b. If a drainage basin is required, that the owner(s) of all lot(s) are responsible for on-going maintenance of drainage basin/adjacent landscaping in a viable condition on a continuing basis into perpetuity. The basin(s) area shall be indicated as a building restriction.
  - c. All driveway approaches shall be constructed in accordance with County Public Improvement Standards. All driveway approaches constructed on County roads

- or project related roads to be accepted for County maintenance shall require an encroachment permit.
- d. Secondary dwellings shall not be allowed on all lots within the land division per Land Use Ordinance standards.
  - e. All driveway approaches shall be constructed in accordance with County Public Improvement Standards. All driveway approaches constructed on County roads or project related roads to be accepted for County maintenance shall require an encroachment permit.
  - f. If improvements are bonded for, all public improvements (roads, drainage, and utilities) shall be completed prior to occupancy of any new structure.
  - g. The applicant shall demonstrate that the project construction plans are in conformance with the applicant's Stormwater Control Plan Application.
  - h. The property owner shall be responsible for the operation and maintenance of public road frontage sidewalks, landscaping, street lighting, and pedestrian amenities in a viable condition and on a continuing basis into perpetuity, or until specifically accepted for maintenance by a public agency.
  - i. All project related drainage shall be designed and constructed in accordance with the recommendations of the San Luis Creek Watershed Drainage Design Manual.

*Air Quality*

- j. **During construction/ground disturbing activities**, the applicant shall implement the following particulate (dust) control measures. These measures shall be shown on the grading and building plans. In addition, the contractor or builder shall designate a person or persons to monitor the dust control program and to order increased watering, as necessary, to prevent transport of dust off site. Their duties shall include holiday and weekend periods when work may not be in progress. The name and telephone number of such persons shall be provided to the APCD prior to commencement of construction.
  - 1. Reduce the amount of disturbed area where possible,
  - 2. Use of water trucks or sprinkler systems in sufficient quantities to prevent airborne dust from leaving the site. Reclaimed (nonpotable) water should be used whenever possible.
  - 3. Vehicle speed for all construction vehicles shall not exceed 15 mph on any unpaved surface at the construction site.
  - 4. All trucks hauling dirt, sand, soil, or other loose materials are to be covered or should maintain at least two feet of freeboard (minimum vertical distance between top load and top of trailer) in accordance with CVC Section 23114.
  - 5. Sweep streets at the end of each day if visible soil material is carried onto adjacent paved roads. Water sweepers with reclaimed water should be used where feasible.
  - 6. All dirt stock-pile areas should be sprayed daily as needed.
- k. Developmental burning of vegetative material within San Luis Obispo County is prohibited. However, under certain circumstances where no technically feasible alternatives are available, limited developmental burning under restrictions may be allowed. Any such exception must complete the following prior to any burning: APCD approval; payment of fee to APCD based on the size of the project; and issuance of a burn permit by the APCD and the local fire department authority. As a part of APCD approval, the applicant shall furnish them with the study of technical feasibility (which includes costs and other constraints) **at the time of application for building permits.**
- l. Only the following types of wood burning devices shall be allowed (based on District Rule 504): a) EPA-Certified Phase II wood burning devices; b) catalytic wood burning devices emitting less than or equal to 4.1 grams per hour of particulate matter, as verified by a nationally-recognized testing lab; c) non catalytic wood burning devices which emit less than or equal to 7.5 grams per

hour of particulate matter, as verified by a nationally-recognized testing lab; d) pellet-fueled woodheaters; or e) dedicated gas-fired fireplaces. **Prior to construction permit issuance**, such devices shall be shown on all applicable plans, and installed as approved by the County.

*Traffic*

- m. The project is located within the City of San Luis Obispo Sphere of Influence per Memorandum of Agreement approved by the Board of Supervisors on October 18, 2005. **Prior to issuance of construction permits for Parcel 2**, the applicant shall contribute toward the project's fair share of cumulative traffic impacts by paying to the City of San Luis Obispo the Orcutt Road Specific Plan traffic impact fee and the Citywide Transportation Fee, as applicable.

*Water*

- n. **Prior to issuance of construction permits**, the applicant shall submit landscape plans for the proposed parcels that includes the following outdoor conservation measures: limited irrigated landscape area of 1,500 square feet, low water-use plant materials, turf area limited to 20 percent of the site's total irrigated landscaped area, soil moisture sensors, and drip irrigation systems.

**Covenants, Conditions and Restrictions**

25. The developer shall submit proposed covenants, conditions, and restrictions for the subdivision to the county Department of Planning and Building for review and approval and recordation along with the map. The CC&R's shall provide at a minimum the following provisions:
- If a fenced drainage basin is required, on-going maintenance of drainage basin fencing, in perpetuity.
  - If a drainage basin is required, on-going maintenance of drainage basin/adjacent landscaping in a viable condition on a continuing basis into perpetuity.
  - If storm water treatment facilities are required, on-going maintenance of said facilities in a viable condition on a continuing basis into perpetuity.
  - Notification to prospective buyers that an additional map sheet was recorded with the final parcel or tract map. The restrictions, conditions and standards set forth in the additional map sheet apply to future development. It is the responsibility of the prospective buyers to read the information contained on the additional map sheet.

**Miscellaneous**

26. The project shall comply with the requirement of the National Pollutant Discharge Elimination System Phase I and/or Phase II storm water program and the County's Storm Water Pollution Control and Discharge Ordinance, Title 8, Section 8.68 et sec.
27. This subdivision is also subject to the standard conditions of approval for all subdivisions using community water and septic tanks, a copy of which is attached hereto and incorporated by reference herein as though set forth in full.
28. All timeframes on approved tentative maps for filing of final parcel or tract maps are measured from the date the Review Authority approves the tentative map, not from the date a time extension request may be acted on.

STANDARD CONDITIONS OF APPROVAL FOR SUBDIVISIONS USING  
COMMUNITY WATER AND SEPTIC TANKS

1. Community water and fire protection shall be obtained from the community water system.
2. Operable water facilities from an approved Public water source shall be assured prior to the filing of the final map. A “final will serve” letter shall be obtained and submitted to Environmental Health Services for review and approval stating there are operable water facilities immediately available for connection to the parcels created. Construction of required improvements (water main extensions, laterals to each parcel) may be delayed, through preparation of plans, posting of bonds, and subject to the approval of County Public Works, Environmental Health Services, and the public water utility. However, bonding may **not** occur for the water well(s) construction, quantity and quality.
3. No residential building permits are to be issued until the community (public) water system is operational with a domestic water supply permit issued by Environmental Health Services.
4. In order to protect the public safety and prevent possible groundwater pollution, any abandoned wells on the property shall be destroyed in accordance with the San Luis Obispo County Well Ordinance Chapter 8.40, and Environmental Health Services destruction standards. The applicant is required to obtain a permit from the County Health Department.
5. When a potentially operational or existing auxiliary water supply (in the form of an existing well(s)) is located on the parcels created by this subdivision and approved community water is proposed to serve the parcels, the community water supply shall be protected from real or potential cross-contamination by means of an approved cross-connection control device installed at the meter or property line service connection **prior to occupancy**. (Chapter 8.30, San Luis Obispo County Code).
6. On-site systems that are in conformance with the county-approved Central Coast Regional Water Quality Control Board basin plan and County Building and Construction Ordinance, Title 19, will be an acceptable method of sewage disposal, until public sewers may become available.
7. No sewage disposal system installations are to be placed closer than 100 feet from the top of any perennial or continuous creek bank, drainage swale or area subject to inundation.
8. For parcels created with approved community (public) water but no community sewers, the approved on-site sewage disposal system shall be designed, where feasible, for ease in ultimate sewerage.
9. Sewage disposal systems shall be separated from any individual domestic well and/or agricultural well, as follows: 1) leaching areas, feed lots, etc., one hundred (100) feet and bored seepage pits (dry wells), one hundred and fifty (150) feet. Domestic wells intended to serve 5 or more parcels shall be separated by a minimum of two hundred (200) feet from a leach field, two hundred and fifty (250) feet from seepage pits or dry wells.

10. Individual systems on new land divisions shall be designed and constructed to either reserve sufficient site area for dual leach fields (100% replacement area), or construct the dual leach fields with a diverter valve at the time of initial septic system installation.
11. Sewage disposal systems installed on slopes in excess of 20% shall be designed and certified by a registered civil engineer or geologist and submitted to the County Planning and Environmental Health Services for review and approval prior to the issuance of a building permit. Consultants shall determine geologically stable building sites and sewage disposal for each parcel, including evaluations of hillside stability under the most adverse conditions including rock saturation and seismic forces. Slopes in excess of 30% are not considered suitable or practical for on-site subsurface sewage disposal.
12. An encroachment permit shall be obtained from County Public Works for any work to be performed within the county right-of-way.
13. An encroachment permit shall be obtained from the California Department of Transportation for any work to be performed on the state highway.
14. Any existing reservoir or drainage swale on the property shall be delineated on the map.
15. Prior to submission of the map "check prints" to County Public Works, the project shall be reviewed by all applicable public utility companies and a letter be obtained indicating required easements.
16. Required public utility easements shall be shown on the map.
17. Approved street names shall be shown on the map.
18. The applicant shall comply with state, county and district laws/ordinances applicable to fire protection and consider increased fire risk to area by the subdivision of land proposed.
19. The developer shall submit a preliminary subdivision guarantee to County Public Works for review prior to the filing of the map.
20. Any private easements on the property shall be shown on the map with recording data.
21. All conditions of approval herein specified, unless otherwise noted, shall be completed prior to recordation of the map.
22. After approval by the Review Authority, compliance with the preceding conditions will bring the proposed subdivision in conformance with the Subdivision Map Act and county ordinances.
23. A map shall be filed in accordance with the Subdivision Map Act and county ordinance prior to sale, lease, or financing of the lots proposed by the subdivision.
24. A tentative map will expire 24 months from the effective date of the approval. Tentative maps may be extended. Written requests with appropriate fees must be submitted to the Planning Department prior to the expiration date. The expiration of tentative maps will terminate all proceedings on the matter.
